Michael Kuchwara of the Associated Press declares, "You can't help having fun," and for this National Tour, Roger Bart and Shuler Hensley reprise their Broadway roles of Doctor Frankenstein and the Monster. "It's alive!"

Awards

YOUNG FRANKENSTEIN received the Outer Critic's Circle Best Broadway Musical Award and five Audience Awards by Broadway.com. Nominated for three Tony and eight Drama Desk Awards, YOUNG FRANKENSTEIN is the perfect blend of the

popular 1974 film by Mel Brooks and Gene Wilder and the classic Mary Shelley novel published in 1818. YOUNG FRANKENSTEIN was created by the Tony Award winning team that brought you *The Producers*: Mel Brooks, director/choreographer Susan Stroman, set designer Robin Wagner, costume designer William Ivey Long and lighting designer Peter Kaczorowski.

The Hartford Courant exclaims, "With lightning lashes, thunder crashes, fog creeps and electrical impulses zigzagging, YOUNG FRANKENSTEIN has come to life! A monster hit!"

"Raising the dead has never been more lively," broadcasts WABC TV.

Syndicated columnist Liz Smith asserts, "Here's a show you can definitely take the kids to and still have a helluva good time too."

Synopsis

The show opens in Transylvania where villagers rejoice at the death of Victor Von Frankenstein, the mad scientist whose creation once endangered their community. They fear that "as long as a Frankenstein walks the earth, their village will never be safe." Meanwhile in New York, scientist Frederick Frankenstein learns of his grandfather's death and journeys to settle the family estate. After meeting a cadre of characters and discovering the journals and secret laboratory of his infamous grandfather, Frederick is enticed to "Join the Family Business" and decides to "re-animate the dead." "When it comes to making monsters, you can't beat the Frankensteins."

...the original story *Frankenstein: or The Modern Prometheus* was written by Mary Shelley when she was 18 years old? One stormy night at a party in Switzerland, Lord Byron challenged his guests to come up with the best ghost story. It was here that Mary Shelley dreamed of the "hideous phantasm of man" that was to become the Monster in the classic Gothic romance *Frankenstein*.

Before the novel was published and the Monster made famous, Shelley's story was rejected by publisher after publisher, including her husband's (poet Percy Bysshe Shelley) publisher and Lord Byron's.

Finally published in 1818, *Frankenstein* is considered by many to be the first modern work of science fiction.

YOUNG FRANKENSTEIN SCIENCE OR MUSICAL

Science or Musical Comedy?

Doctor Frederick Frankenstein, Yale graduate, is a "professor, the Dean of Anatomy at New York's most famous institute of higher learning, the Johns, Miriam, and Anthony Hopkins School of Medicine."

He comes from a long line of scientists who have been trying to create life since 1201.

Frederick's grandfather

"Brought dead tissue back to life."

"Created a horrifying monster."

"Prowled around graveyards, digging up freshly buried corpses."

But Frederick is devoted to pure science and "deals in fact not fiction...truth and reason." Yet, upon reading the journals and finding the secret laboratory of his grandfather, he embarks upon a journey to create life. How can he do it?

"Take your knife, create a life."

Exhume a corpse and steal a brain. Is this scientifically possible? Or is it just musical comedy?

Actually, it sounds a lot like organ donation. Organs can be transplanted from one body (living or dead) to another. Is this how Dr. Frankenstein created the Monster?

In today's scientific world, donated organs, often referred to as the "gift of life" are used by doctors to replace damaged or failing ones. The first successful kidney transplant taken from a cadaver was performed in 1962. In fact, some transplanted organs can come only from someone deceased. Today, however, living donors can provide people in need with a kidney, liver, lung, and in extremely rare circumstance, heart or intestines.

Do the doctors use electricity to transplant an organ? No. Surgery is the answer.

But what about Frederick Frankenstein's "lightning bolts and thunder" to "ignite a mortal spark?" After all, a heart does have electrical signals that cause it to beat.

Could this be compared to the use of defibrillators that can help to start a heart?

A defibrillator is a device that gives an electric shock to the heart to move blood to the brain or other organs. If a heart is not beating, a cardiopulmonary bypass machine (also known as a heart lung machine), or an ECMO machine, keeps a person alive while their heart is stopped or even removed, because it acts as a surrogate for the normal functions of the heart and lungs.

"Through the wind swept air, listen to his prayer, stir its brain, let breathing start." Can electricity start breathing? What about the use of a ventilator?

A ventilator is a machine powered by electricity that helps a person breathe when unable to do so for him or herself.

It seems that Frederick Frankenstein and his grandfather Victor weren't so far off the mark. "Now we call on science

To end death's evil reign We shout in brave defiance This soul shall live again."

YOUNG FRANKENSTEIN is a little bit of science and a lot of musical comedy.

Talking with Roger Bart

Buzz Extra spoke with Roger Bart, who originated the role of Dr. Frederick Frankenstein, and now reprises the role in the National Tour. Mr. Bart is no stranger to Mel Brooks, as he originated the role of Carmen Ghia in The Producers, before taking over the role of Leo Bloom. He earned Tony and Drama Desk Awards for his portrayal of Snoopy in You're A Good Man, Charlie Brown, as well as Outer Critics Circle and Drama League Award nominations for his performance in YOUNG FRANKENSTEIN.

BART: I'm very excited about the National Tour. I've been to PlayhouseSquare three times. I always like the theaters and the Cleveland audiences are wonderful and appreciative.

EXTRA: You played Igor (pronounced EYE-gor) in the original workshop previews of YOUNG FRANKENSTEIN, right?

BART: I think they originally had me in mind for Igor, so I did the first workshop of it and it was a lot of fun. I always thought of myself as an Igor. I've always loved the clowns more than anything. But I think being hunched over for 300 shows would be a little tiring.

EXTRA: How did you transition from playing Igor to Frederick Frankenstein?

BART: I was ready to go as Igor but then I remember getting a phone call from the director asking me if I'd like to play Frederick. I had spent time playing Leo Bloom, Matthew Broderick's role in *The Producers*. I guess they thought I had the necessary tools to be both a romantic lead and funny.

EXTRA: What was it like to work with Mel Brooks?

BART: I was a big fan of this movie...all Mel Brooks movies. I had a lot of one-on-one time with him during YOUNG FRANKENSTEIN. He is able to write on the spot in such a funny way. Mel is like an uncle, a dad to me. I love having him in the room, you can always tell if something is cooking or not. And since we were sitting with Mel, we were sitting with a

natural transition for stage. There had not been a lot of comic monster musicals on Broadway, so we thought it would be unique. And because of the movie's popularity, it would be a great choice. We wanted to keep Mel on Broadway as long as we possibly could. We had one up and were pushing the next one on him. I wouldn't mind being part of the Mel Brooks Repertory Company for the rest of my career!

EXTRA: Actually, you are a part of the Mel Brooks Repertory Company.

BART: So it would appear.

EXTRA: What's your favorite song from the show?

BART: My favorite song is "Together Again." I do love vaudeville. My great uncle played with George Burns and Gracie Allen way back in '29 and '30. So whenever I do that song with Igor, I channel my great Uncle Murray. He was a whistling comic. I also loved Mel Blanc, the other Mel who was influential in my life and all the Warner Brothers cartoons. So many of them are great vaudeville sketches, probably where I learned everything. Daffy Duck was the greatest comic villain of our nation.

EXTRA: So, is Blazing Saddles the next Mel Brooks musical?

BART: I don't really know.

EXTRA: But if it is next?

BART: Oh yes, I'll be there.

EXTRA: Meanwhile, with YOUNG FRANKENSTEIN?

BART: Cleveland audiences are in for a good time. It's a fun romp. Halloween is a great

time to have a monster musical in town.
